Change in leadership at eccos pro

As from 1 January 2009 Andreas Oos has assumed the management of eccos pro gmbh, Velbert (Germany) and the affiliated company NOVACOM Software GmbH, Bad Aussee (Austria).

Frank vom Endt, who successfully headed eccos pro since the company's foundation in the year 2000 and also the affiliated company of NOVACOM since the end of 2006, was appointed as deputy chairman of the executive board of Schulte-Schlagbaum AG with effect from 1 January 2009 by means of a resolution of the supervisory board of Schulte-Schlagbaum AG, the parent company. In this capacity he will also continue to actively accompany the "Ticketing Systems" division of Schulte-Schlagbaum AG that is represented by both affiliated companies, eccos pro gmbh and NOVACOM Software GmbH. Under his leadership eccos pro gmbh together with the Austrian affiliated company emerged as one of the leading computer retailers for leisure and hotel facilities in German-speaking countries.

Andreas Oos, who is replacing Frank vom Endt, was employed successfully for several years as managing director of the electronic payment transaction division of a finance company.

Together with the reliable and otherwise unchanged team he will pursue the positive business development and, in particular, continue to expand the outstanding market position of eccos pro in the area of complex system solutions for thermal springs, spa projects and leisure and wellness resorts as well as for the hotel industry.
