Schulte-Schlagbaum AG acquires EDV-Service Schaupp GmbH

Schulte-Schlagbaum AG, based in Velbert, has acquired the company EDV-Service Schaupp GmbH, based in Bietigheim-Bissingen, effective from 1 January 2010.

A niche specialist, EDV-Service Schaupp GmbH is one of the leading software system vendors for the organisation and cashless charging of lunchtime catering services. EDV-Service Schaupp GmbH has been present for more than 30 years with innovative software solutions in both the communal catering segment in workplace canteens and cafeterias and on the fast-growing schools catering market. The company also contributes its expertise in the cashless payment transactions field to the eventcash consortium, in which cashless payment systems are developed for stadiums and event venues. In addition, EDV-Service Schaupp GmbH has for many years been a member of the money card initiative Initiative Geldkarte eV.

Having integrated MAFIS GmbH into the Schulte-Schlagbaum Group in January 2005, SAG is now bringing its portfolio in the guest management segment closer to completion by acquiring EDV-Service Schaupp GmbH. On the schools market, Schulte-Schlagbaum AG's fields of competence in the buildings organisation and securing segment are being supplemented optimally with the areas of lunchtime catering charging systems and payment transactions. Further synergies are expected within the framework of an upcoming merger with the SAG subsidiary eccos pro gmbh's service organisation.
