mafis[®] system solution for the "Tauern SPA Zell am See Kaprun"

After implementation of a mafis[®] guest management system at St. Martins Spa & Lodge in Burgenland (Austria) in November 2009 and the current Therme Wien-Oberlaa (Vienna-Oberlaa Spa) project (opening scheduled for autumn 2010), eccos pro has now also received the order for a further major project planned by the operating company VAMED Vitality World in Austria:

The "Tauern SPA Zell am See Kaprun", located in Kaprun overlooking the unspoiled mountain environment of the Hohe Tauern national park, is also to be completed in 2010 and launched with a mafis[®] guest management solution.

In the process, VAMED Vitality World, the largest operator of spa and health resorts in Austria, focusses on the reliable cooperation of well-known system suppliers such as Protel (hotel system), HIS Solution (software systems for calendar management in the spa/vital/beauty/wellness field) and novacom (catering POS systems) and directed by eccos pro as system integrator.
